

AIR VENT MOUNT

iDeal Air Vent Mount is a universal magnetic car phone mount for use with any model of phone or car.

Using the highest grade N52 magnets, this product will hold your phone safely in place without interfering with any of the phone's functions. High quality silicone maximizes friction to reduce slippage. The iDeal Air Vent Mount allows you to easily follow GPS directions, text, or take important calls. The mount was designed to allow full 360-degree rotation,

providing the user with the optimal viewing angle. Included are two ultra-thin metal plates which can be placed directly on the device or inside any case. As a part of The iDeal Concept, the mount also works perfectly with any of our magnetic cases and wallets without using the included metal plates.

- > Compatible with all cars
- > 100% safe
- > Compatible with our range of cases and wallets
- > 360 degree adjustment
- > Includes 2x adhesive metal plates for all nonmagnetic cases
